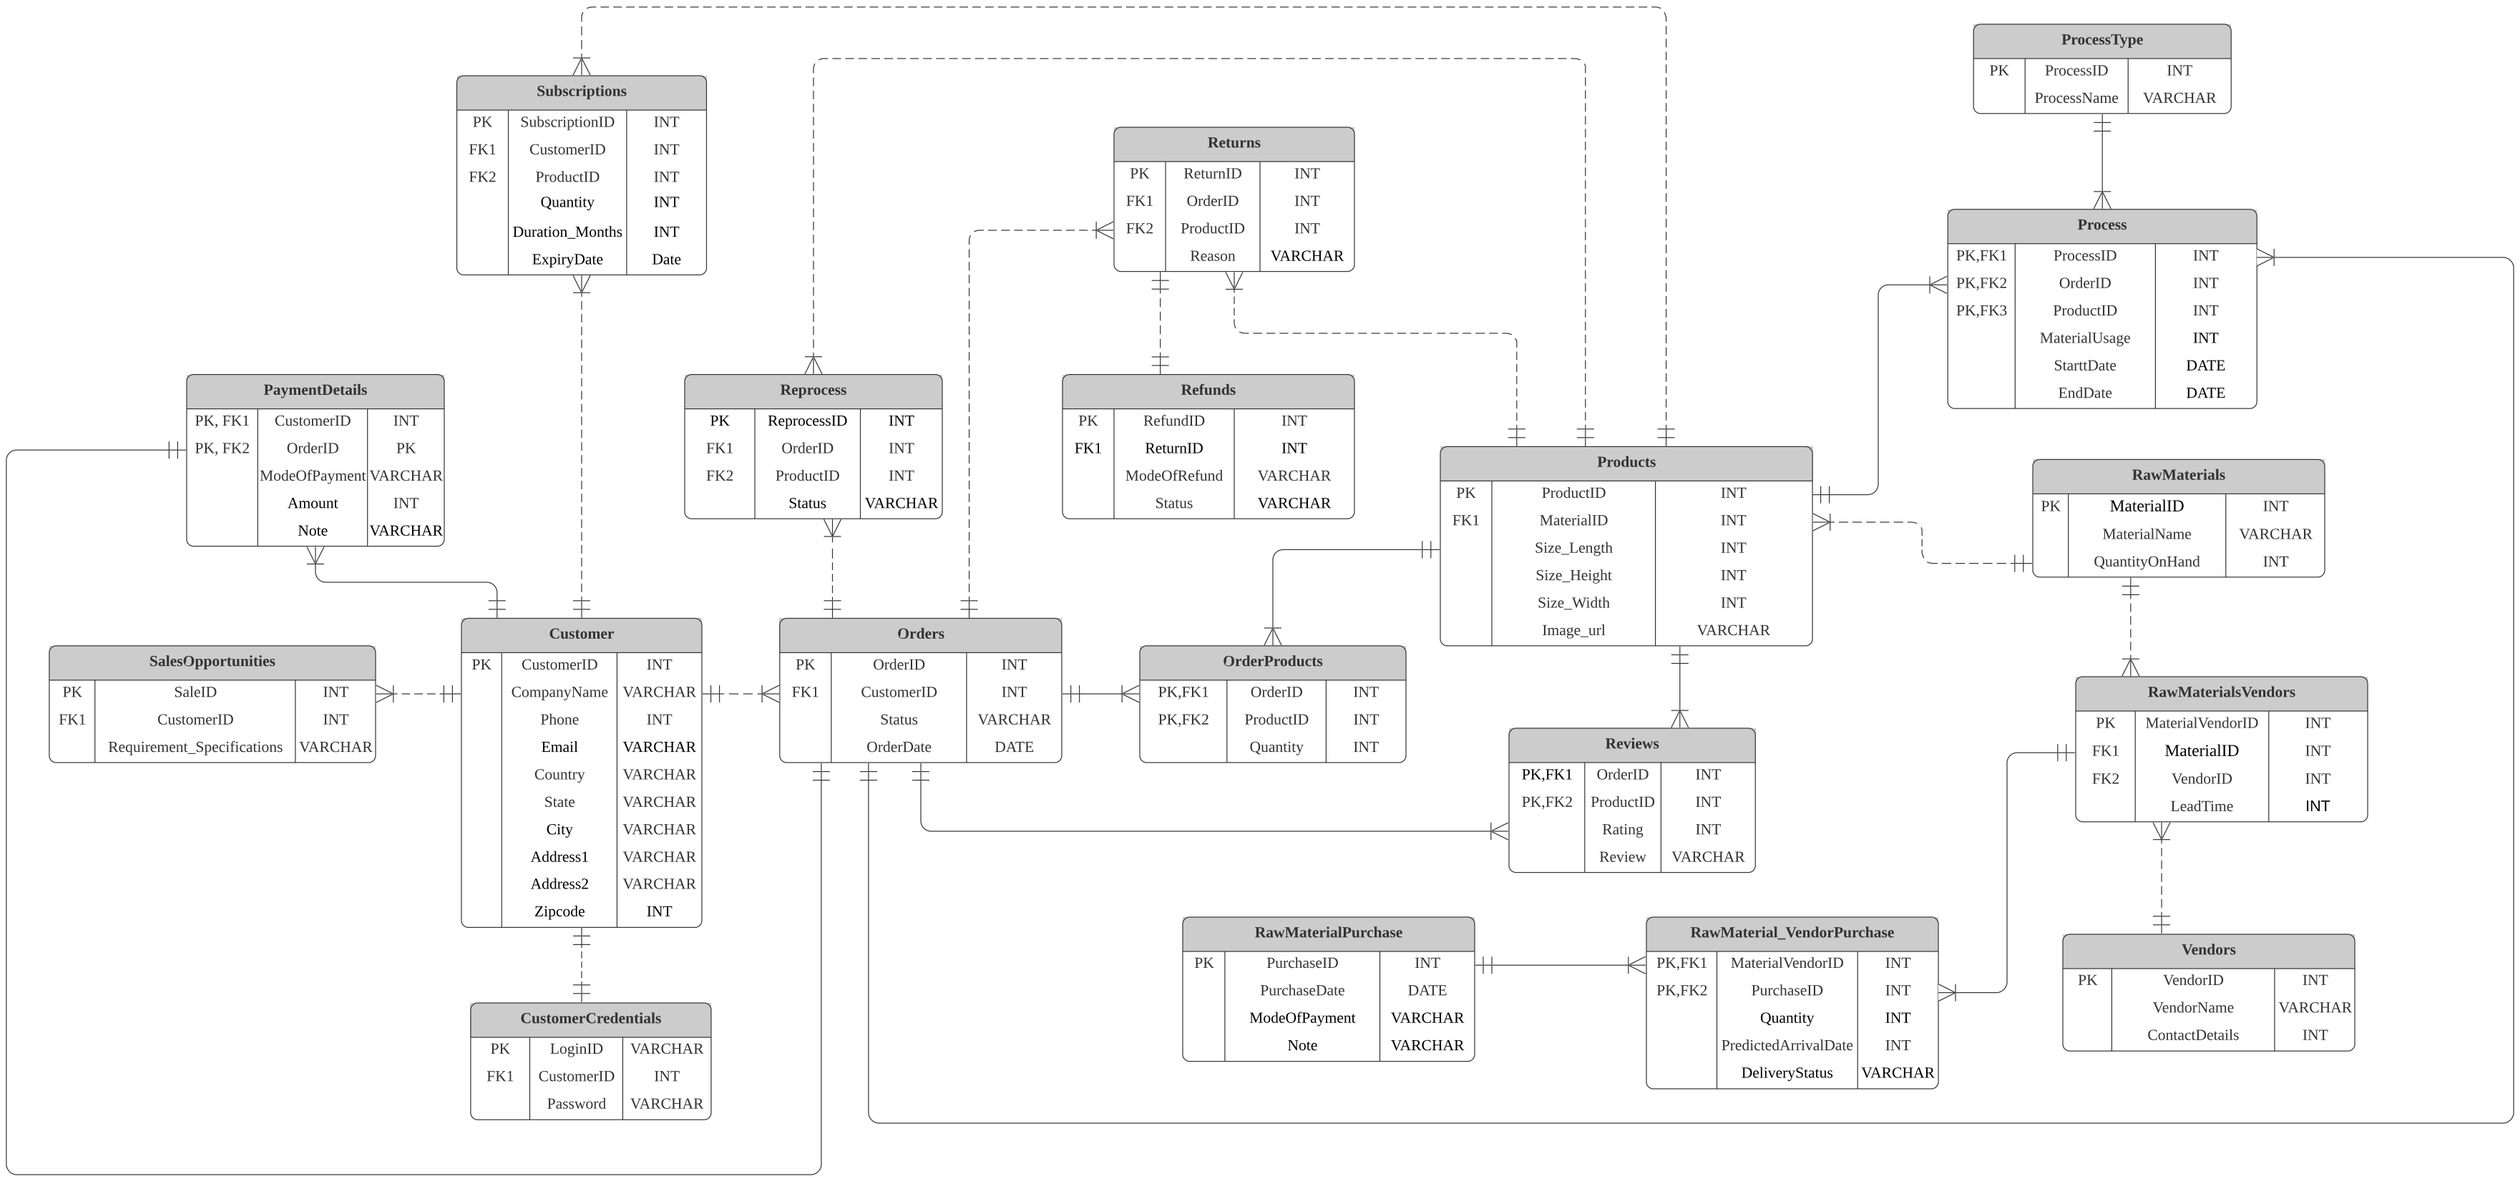
# Package Manufacturing Database System

Anjali Chitkara, Nuli Bang, Priya Raul, Hans Huray, Jaya Kalele



Brief description of the changes made to the ERD :

**VENDORS & MATERIALS :**

1. We have only the Vendor information in the Vendors table now. Material specific information has been moved to a different table(**RawMaterialsVendors)**
2. Information about materials sold by vendors can be found in **RawMaterialsVendors**.
3. Removed the relationship between **RawMaterials** & **Processes**

**PURCHASE FROM VENDORS:**

4. To know that which material has been purchased by which vendor, we have created a new associative entity(**RawMaterial_VendorPurchase** )to avoid the many to many relationship b/w **RawMaterialPurchase** & **RawMaterialVendors.**
5. **RawMaterialPurchase** table holds only the purchase history.
